DETAILED ACTION

Acknowledgement is made of Applicant's IDS received 16 March 2004.

Election/Restrictions

Applicant's election of Invention I, Species A in the reply filed on 27 October 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 9-15 are withdrawn because they are drawn to a non-elected invention, and claims 6 and 7 are withdrawn because they are drawn to a non-elected species.

Claim Rejections - 35 USC § 102

((b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Spinazzola (Quality Deer Management Assoc.).

As to claims 1-3, Spinazzola discloses a method of luring wildlife comprising planting two or more herbicide resistant seeds, corn and soybeans ("GLYFLO corn" and "glyphosate-ready soybeans" of page 1) in a food plot near desirable habitat ("corn along the fencerows and woods" of page 1), waiting for the seed to germinate, and spraying the food plot with a broad spectrum herbicide, glyphosate (from "four weeks later" of page 1).

As to claim 4, Spinazzola further discloses the seed at a particular ratio to one another (in that the plot is a given size with a given amount of each seed used).

As to claim 5, Spinazzola further discloses the ratio is varied to attract a certain type of wildlife (in that the corn and soybeans are to attract a certain species - deer).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Olson, NRSC, ~~Balcermans et al.~~, Knight, Clemson Extension, and ~~Byford~~ disclose in the prior art various plots for wildlife and/or use of GMO seed.
